

## Real Worth vs. Low Cost

If you asked your butcher for a porterhouse steak and he handed you a cut of the flank and said, "This doesn't cost as much and is just as good," you wouldn't believe him, would you?

Yet the butcher's statement is just as truthful as an assertion that inferior baking powders made of alum or phosphate of lime are as good as Dr. Price's, which is made from cream of tartar.

Alum is a mineral acid salt, declared by many medical authorities unsafe to use in food.

Dr. Price's Cream Baking Powder is as pure and wholesome as the grapes in the vineyard, from which cream of tartar is derived.

The only reason for using such substitutes as alum and lime phosphates is because their cost is less to the manufacturer.
